

# Unit Information 

Model: Hand Agitated Skid
Year:
Gallons:
Serial Number:

# Seal-Rite Inc. <br> 1374 State Road M <br> Auxvasse, MO 65231 (573) 387-4491 <br> www.seal-rite.com sales@seal-rite.com 

## Safety Precautions

-Failure to follow all safety precautions can result in serious injury or death.
-Seal-Rite Inc. assumes no liability for any accident or injury incurred through improper use of machine.
-Read Operator's Manual fully before operating machine.
-Observe all caution and warning signs on machine.
-Always wear ear protection, eye protection and gloves when operating machine.
-Precaution is the best insurance against accidents.
-Use of parts other than Seal-Rite parts may impair the safety or reliability of your equipment and nullifies any warranty.
-Keep manway safety screen in place at all times.
-Keep all body parts out of lid opening when unit is being agitated.
-Keep hands and arms clear while opening and closing lid.
-Keep tank lid closed when agitating.
-Never enter the tank with sealer inside.
-Always let residual sealer dry or freeze before entering the tank.
-All ball valves must be fully opened or closed for correct use.
-Never operate near an open flame, or use any type of flame to unclog the plumbing.
-Check all included owner's manuals for warnings, cautions and to ensure proper use.

## Warranty Procedure

-Contact Seal-Rite regarding the problem.
-If the item is warrantable, the following instructions may be given:
-Seal-Rite will ask you to return the damaged item so that a replacement can be sent to you. If you need the replacement sooner, you can purchase it, to be refunded upon receipt of the damaged item.
-Seal-Rite is not responsible for warranty shipping costs.
-Certain products are subject to review before they can be deemed a warranty item.
-NEVER throw away any replaced parts until the warranty is entirely settled.
-If the item cannot be sent back (i.e. damage to the unit itself), photographs will be required.
-Should your warranty work require the help of a professional to repair, reimbursement for the labor cost is at the discretion of Seal-Rite. A valid receipt of all work will be required.
-If the item is covered under the original equipment manufacturer's warranty, we can help connect you with the OEM.
-In the event that your item is not warrantable, Seal-Rite strives to keep all replacement parts in stock.

## Cleaning the Unit

-Fill the tank halfway to completely full of water. Agitate the system for 30 minutes, periodically changing from forward to reverse. Empty the tank and repeat the process if needed.
-Depending on several variables, it will eventually be necessary to get inside the tank to remove excess sealer that has built up. Removing residual sealer is best done when temperatures are below freezing (or as cold as possible in warmer climates). Be careful when removing sealer with tools, as it is possible to ding the tank.
